Sep 27, 2020 Q: MySQL Query to return rows from one table that are not in second table I am trying to find a way to select rows from table A that don't exist in table B (same key)

```
CREATE TABLE A ( 'id' INT NOT NULL PRIMARY KEY AUTO_INCREMENT, 'a_name' VARCHAR(30) NOT NULL, 'b_id' INT NOT NULL ); INSERT INTO 'A' ('a_name','b_id') VALUES('bucket','11'), ('bucket','12'),('bucket','13'),('bucket','14'); CREATE TABLE B ( 'id' INT NOT NULL PRIMARY KEY AUTO_INCREMENT, 'b_name' VARCHAR(30) NOT NULL, 'a_id' INT NOT NULL ); INSERT INTO 'B' ('b_name','a_id') VALUES('bucket','11'),('bucket','12'),('bucket','13'),('bucket','14');
```

I am using the following to fetch rows from table B which don't have a matching row in table A

```
SELECT b.id FROM B WHERE b.id NOT IN ( SELECT a.b_id FROM A WHERE a.a_id = b.a_id )
```

but this is returning duplicate rows as seen in the image below. I also tried the following but this did not return any results, no idea why.

```
SELECT b.id FROM B WHERE b.id NOT IN (
```

---

```
SELECT a.b_id FROM A WHERE a.a_id = b.a_id
```
